

Where is the worked exercise for Assignment 2.2?

As the course progresses, we will not always provide complete worked exercise videos for every assignment. Later in the course, we may provide a video of a worked exercise that is *similar* to the assigned exercise. All this is designed to get you to the point where you are solving the problems on your own without just watching a video and doing what the video does.

This is the first exercise you are supposed to do without referring to a complete video. Give it a try. If you have trouble, go back to the lectures or even re-do the earlier problems or work on 2.3 first. One way or another, don't just look for the "easy" way out on this assignment. Take this as an early "challenge" to make sure to test your learning.
